

Dear Mayor DeBaun,

Meridium is a foreign-based infrastructure company with no prior experience building broadband networks, so why has our government decided to gift them this project?

There has been no public input in this process where politicians have provided Meridium with this opportunity.

The people of Shelbyville, Indiana deserve to see the plan for this broadband network before having to vote on it. Surely if the plan would benefit the citizens of Shelbyville it wouldn't be kept secret.

The following citizens of Shelbyville oppose this project and urge their representatives to protect Shelbyville taxpayers by abandoning this plan.
